Abacus 3CT

3-PART WBC DIFFERENTIAL
ANALYZER

ANALYZER OVERVIEW

The Abacus 3CT system is a compact, bench top, 60 test/hour, 3-part WBC differential analyzer with two sampling modes: a cap piercing mode for closed tube sampling and another for open tubes. The Abacus 3CT has a large color touch

screen with an easy to follow, intuitive icon user interface. The system is an ideal solution for small laboratories, satellite clinics and doctors' offices that are looking for reliable, safe, accurate and easy to use instrumentation.

DIATRON REAGENTS

Our systems comprise of two perfectly matched elements: analyzers and reagents. The optimum performance of our analyzer systems is only achieved when our matched reagents are used. Our ISO 13485 certified reagent manufacturing plant is designed to ensure the highest quality standards. All lots of reagent we manufacture are fully validated prior to release on each of our associated instruments for low background

counts, osmolality, pH and other critical parameters. Our diluent reagents contain no azide and our lyse reagents are cyanide free. Our highly stable reagents offer a shelf life of up to 36 months from the date of manufacture and up to 120 days of onboard stability. The combination of Diatron reagents and Diatron analyzers together ensure the best system performance and quality of results.
